Special Requirements?

Answers

Five (5) or Ten (10)

Leukoreduced, Irradiated or Leukoreduced/Irradiated

- RHIG

Added Prompt

Gestational Age?

Answers

Less than 20 weeks, 20 weeks or greater, post partum

New Product Orders

- Plt Pheresis, HLA matched
- Neonatal Platelet concentrate prompt – number of cc's required?
- Directed Donor Product

New Procedure Orders

- ABO/RH Fetal
- DAT Fetal
- DAT Neonatal
- Maternal Fetal Screen – Renamed from F-M Bleed

Microbiology

- Microbiology and Serology tests are not **IN-LAB** status, until they get logged into Microbiology (not CP).
- MRSA Culture (C MRSA) replaces Miscellaneous Culture (C MISC) for nasal screens.
- Miscellaneous Culture (C MISC) is available only for odd sources.
- Group A Beta Strep Screen (Rapid Strep A) replaced Beta Strep Culture (C BETA).
 - When the Rapid Strep test is negative, it will reflex to a Group A culture (C GA).
- Urinalysis with culture if indicated (UA doif)
 - Two specimens are required for this collection – Yellow and Gray tubes.
 - If the WBCs are >10, an **add-on** Urine Culture (C Urine) will **THEN** be ordered.

Chemistry

- New GFR reference range and change in calculation as per the National Kidney Disease Education Program recommendation.
- GFR Reference range: greater than or = to 60.
- We will no longer calculate a number greater than 60 for patients.

Order Panels

- Order Panels are used much more frequently with Cerner Millennium.
- Some common orders, such as Type & Screen and Urine Drug Screens, will now be ordered as Order Panels.
- The main change with Order Panels is that there are no default settings possible, in Epic, for the panels.
